

PRODUCT USE GUIDE FOR NOVACARE BN101

Product Description

A premium quality floor maintainer containing a complex range of waxes to clean, protect and polish in one operation. Leaves a long lasting antistatic finish which dissipates static charge.

Product Features

- For use as a mopping fluid on vinyl, vinyl asbestos, linoleum, thermoplastic, wood, sealed wood, sealed cork, terrazzo and marble floors, etc. Also for use for spray-cleaning.
- A mopping fluid with a protective residue. Even the least skilled operator can restore the floor's appearance without leaving streak marks. Dries to a pleasing finish without machine buffing. However, if burnished, the flexible residue will respond to give good recovery and a superb gloss.
- Simple and Effective - Use on top of 'NOVA LONG-LIFE', 'NOVASHIELD', 'NOVACRYL', NOVAGARD and other metallised floor dressings. Maintains a long-lasting shine. Dries quickly. Repairs well. Imparts antistatic properties.

Direction for Use

Initial Treatment – For best results, old emulsion polishes should be removed. 'NOVA LONG-LIFE' Floor Dressing should then be used to provide a base, priming treatment. If the floor is already treated, immediately proceed to maintain with 'NOVACARE':

1. Sweep, dust-mop or vacuum away loose dirt and litter.
2. Either a) For Mopping: At first use 400ml per 5 litres of COLD water. Later this can be reduced to 200ml per 5 litres. Damp wipe, frequently washing out the mop in the solution. If desired, the floor may be burnished after it has dried. Or b) For Spray Cleaning: Use 400ml diluted with 5 litres of water. Thinly spray a fine mist onto dirty areas only. With a fine synthetic spray-cleaning pad under a floor machine, buff the area clean and dry - to a fine finish.

For Use in Scrubber Driers

Use rate: dilute 2% in warm water. Add to the detergent tank.
